S-TILE-BOND™ – ADHESIVE

S-tile-bond is single component elastomeric joint bonding adhesive.

It is easy to use for bonding purpose.

Physical Properties -

Chemical Composition	Epoxy Resin
Appearance	Light Yellowish
Density	1.15

Curing -

Soft Drying	2.00 Hrs.
Hard Drying	4.00 Hrs.
Tough Drying	8.00 Hrs.

Storage & Handling -

Store	Dry and Cool place
Self Life	12 months

Application -

Method	Spatula, Injector
--------	-------------------

S-tile-Bond can be used for -

S-Tile-Bond Benefits

- Good resistance to high temperatures
- Excellent resistance to vibration
- Easy to use no mixing required
- Excellent adhesion to any substrate
- Rapid low temperature heat cure
- Fireproof/Waterproof
- Low odour.
- Walls and Ceiling
- Dry Walls
- Metals (Steel, Aluminium, Iron)
- Plywood
- Glass
- Plastics
- Outdoor surfaces
